

# Delivering accurate personal budgets to children and young people

- Capture the needs of the child or young person
- Assess the sustainability of support from parent(s) and carer(s)
- Estimate budgets fairly and consistently
- Easily report on and monitor outcomes
- Explore patterns in service users' needs

## Co-produced alongside councils and CCGs

Local Authorities (LAs) in England are required to offer families of children and young people with special educational needs and disabilities (SEND) the option of a personal budget.

Working with over 15 LAs as well as schools and parent/carer representatives, we have co-produced Formulate, a strengths-based tool that estimates accurate personal budgets for children and young people across social care and Continuing Care.

## Estimate budgets with confidence

Includes the country's most used and trusted solution for estimating personal budgets.

## Consistent and defensible

Offers a defensible and transparent approach to estimating personal budgets.

## Joined-up approach

Co-produced with health and social care practitioners, the tool facilitates integrated working to deliver better outcomes.

## Faster assessment process

Faster, proportionate form completion as questions only appear if they're relevant.

# Key features

## Allocation Summary

Find a breakdown of the estimated budget by domain.

## Quality Assurance (QA) Feedback

The 'Auto-QA' checks for common errors.

## Needs Profile

This captures the needs of the child or young person and their family in a 'scored' way that can be used to support budget calculations.

## Analytics and reporting

We also offer access to Atmolytics, for powerful analysis of needs and costs of your local population.

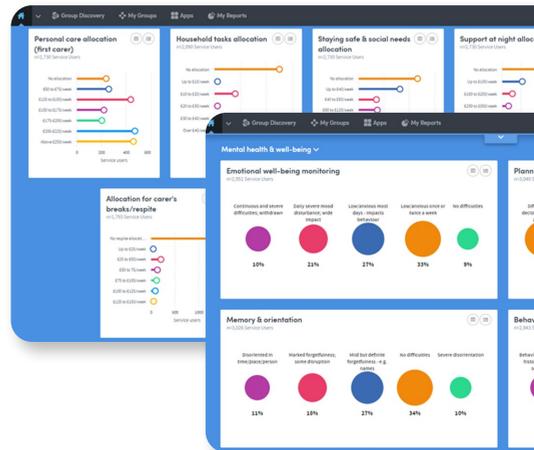

## Track needs, outcomes and performance

Managers and performance staff can easily explore and report on budgets and people.

- Explore patterns in needs
- View how much in Personal Budgets was allocated over the last quarter
- See how many actual budgets exceeded estimated budgets
- Create reports for panel meetings

## Compatible with leading IT systems

The tool can either be used within our Care Partner platform or embedded into any of the main case management systems, including Liquidlogic, Servelec, Careworks and OLM.
